

The AMO's IntraLase™

✓ Reconditioned

✓ Calibrated

✓ Patient Ready

This femtosecond delivers biomechanical superiority, excellent visual acuity, and unmatched safety. This innovative technology is also well suited for creating uniquely shaped corneal incisions for corneal transplant surgery.

Replacing the [blades](#) commonly used for corneal flap creation with a femtosecond laser, AMO® has made LASIK eye surgery safer than ever before. The IntraLase™ FS Laser System delivers micron-level accuracy 100% greater^{1,2} than a microkeratome for more accurate and

consistent flap thickness — which is critical for a successful
[outcome](#)

[LASIK](#)
